

CRITERION – 1

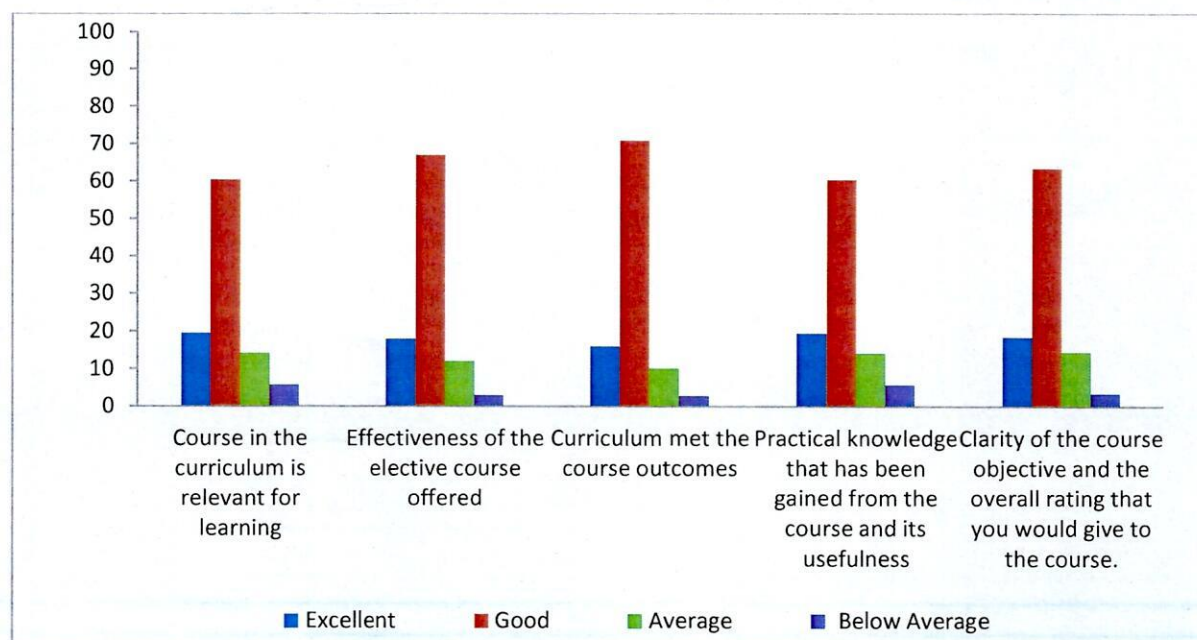

Curricular Aspects

1.4.2 The feedback system of the Institution

Feedback Analysis of Stakeholder (2017-2018)

Analysis of feedback by Students

Description	Excellent	Good	Average	Below Average
Course in the curriculum is relevant for learning	165	511	120	49
Effectiveness of the elective course offered	152	565	101	25
Curriculum met the course outcomes	135	599	86	24
Practical knowledge that has been gained from the course and its usefulness	553	1717	403	165
Clarity of the course objective and the overall rating that you would give to the course.	525	1802	411	99

Analysis of feedback by Alumni

Description	Yes	To Some Extend	No
Identify, formulate and solve engineering problems with the knowledge of curriculum.	647	162	0
Courses are relevant to professional and ethical responsibility.	655	150	4
Courses are focus on enhance research and manage the projects	639	150	20
Depth of the curriculum is well designed, as well as analyzes and interprets the experimental data.	631	158	20
Curriculum competence is useful for solve emerging real-world problems	635	174	0
Curriculum is useful for the analysis/design of core profession.	643	150	16

Analysis of feedback by Employer

Description	Exceeds Expectations (%)	Meets Expectations (%)	Below Expectations (%)
Competence of our graduates based on the curriculum	70	29	1
Level of Technical Contribution	71	28	1
Level of Success in learning new areas and engaging in professional development.	77	23	0
Success for adapting to technological change.	77	22	1
Curriculum met the ethical and social responsibility	69	29	2

Analysis of feedback by Faculty

Description	Yes	No
Course includes the topic relevant to current trend	324	40
Electiveness of the course offered	317	47
Course content satisfies the course objectives	331	33
