Hello, I'm R.Soundarya,  
I work as a Software Development Engineer at Paypal. I am happily employed in this wonderful company since 2019 only because of the career planning services of my college, Karpagam College of Engineering. I would sincerely express my gratitude to the institution for providing me the best learning environment. I learnt and practiced Engineering; I made some very good friends; I began to respect the effort of teachers to enlighten every student. "Learning without fun is no learning at all" and Karpagam College of Engineering knows that well. I could proudly and profoundly state Karpagam college of Engineering as "My College" because the college really is a college for students.

Hi I am Arun,

I am working as Senior Software Engineer in Robert Bosch Engineering and Business Solutions. I completed my Electrical and Electronics Engineering in Karpagam College of Engineering in 2013. **Finding the right path to success at the right time is really very important** and for that way I had selected KCE. The friendly environment, the systematic approach towards imparting education at KCE made me a competent individual. I love that I could come back anytime and be welcomed with open arms. I look forward to coming back and giving back to the college that gave me so much. Thank you for everything.

Hi I am Thanujvashan S

I am currently with CISCO as a Software Developer. I completed my BE in EEE from our Karpagam college of Engineering, in the year 2016. Dreams and aspirations change with time and that is a sign of progress. Opportunity as a Software Developer happened through on Campus. I don't think many of the colleges will provide such opportunities which bring out our interests/talents. Our beloved staffs played a vital role in shaping me up to be the efficient me that I am today.
