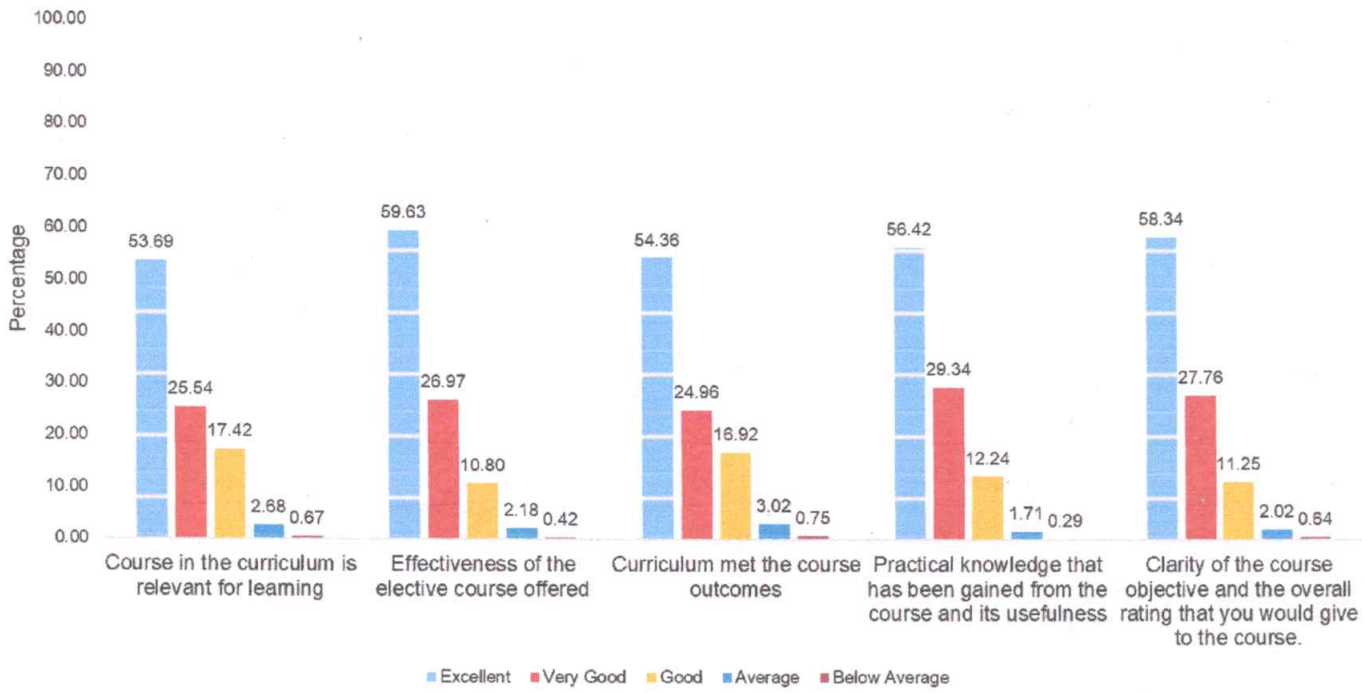
CRITERION – 1	Curricular Aspects

1.4.2 The Feedback System of The Institution

Feedback Analysis of Stakeholder (2023-2024)

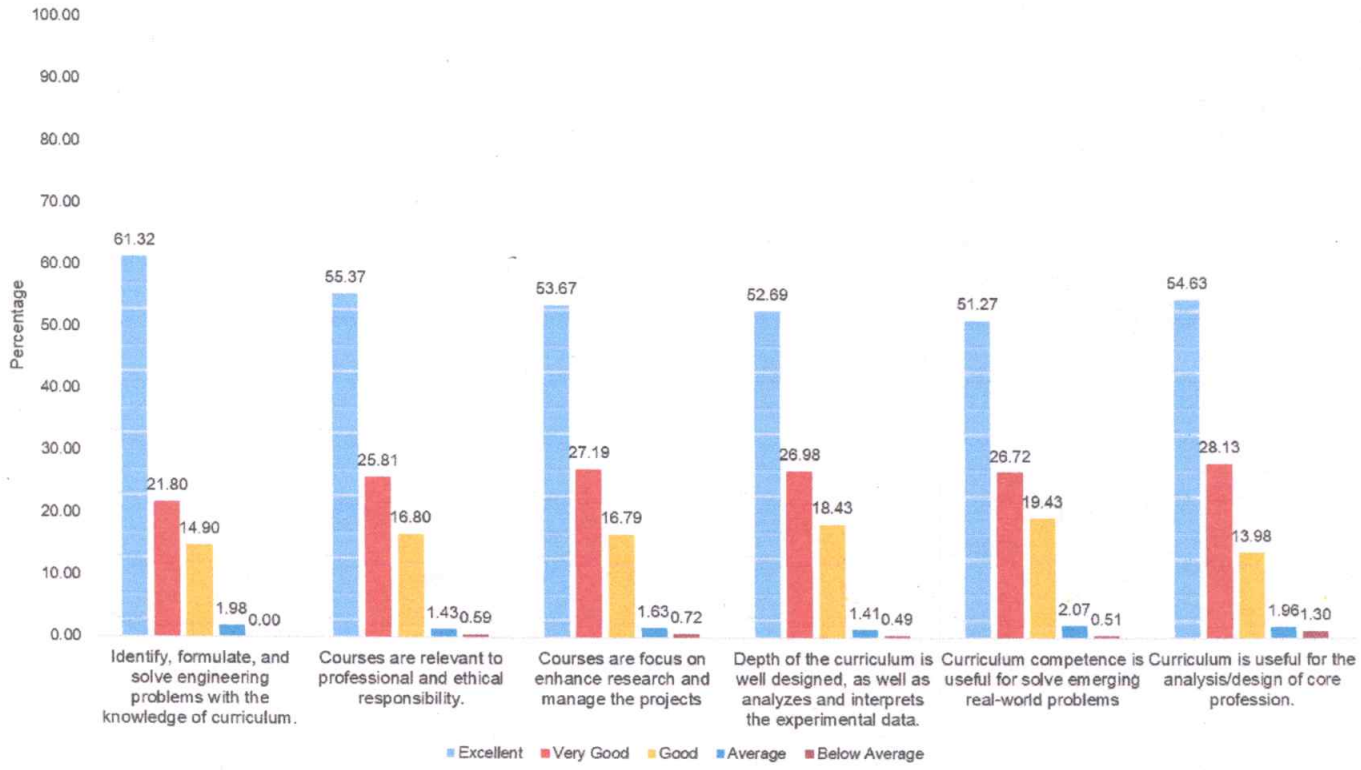
Analysis of Feedback by Students

Description	Excellent	Very Good	Good	Average	Below Average
Course in the curriculum is relevant for learning	641	305	208	32	8
Effectiveness of the elective course offered	712	322	129	26	5
Curriculum met the course outcomes	649	298	202	36	9
Practical knowledge that has been gained from the course and its usefulness	2738	1424	594	83	14
Clarity of the course objective and the overall rating that you would give to the course.	2831	1347	546	98	31



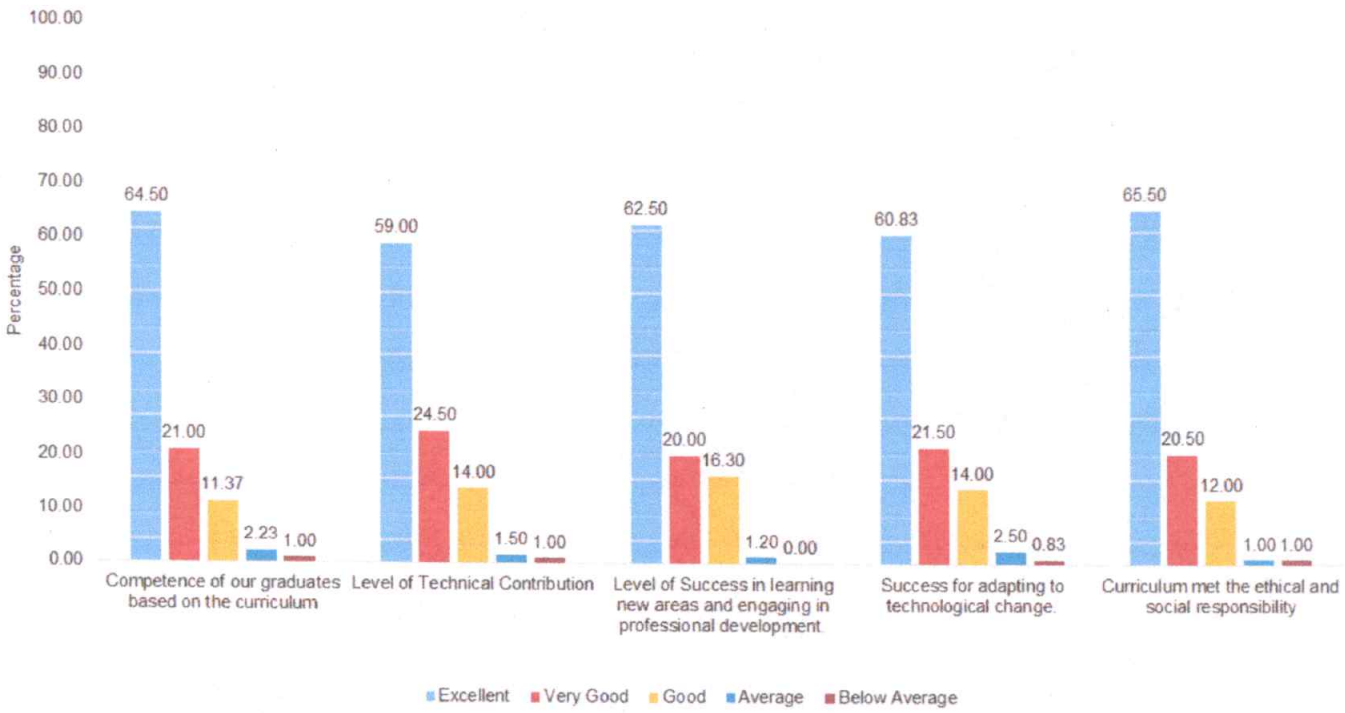
Analysis of Feedback by Alumni

Description	Excellent	Very Good	Good	Average	Below Average
Identify, formulate, and solve engineering problems with the knowledge of curriculum.	547	194	133	18	0
Courses are relevant to professional and ethical responsibility.	494	230	150	13	5
Courses are focus on enhance research and manage the projects	479	243	150	15	6
Depth of the curriculum is well designed, as well as analyzes and interprets the experimental data.	470	241	164	13	4
Curriculum competence is useful for solve emerging real-world problems	457	238	173	18	5
Curriculum is useful for the analysis/design of core profession.	487	251	125	17	12



Analysis of Feedback by Employer

Description	Excellent	Very Good	Good	Average	Below Average
Competence of our graduates based on the curriculum	77	25	14	3	1
Level of Technical Contribution	71	29	17	2	1
Level of Success in learning new areas and engaging in professional development.	75	24	20	1	0
Success for adapting to technological change.	73	26	17	3	1
Curriculum met the ethical and social responsibility	79	25	14	1	1



Analysis of feedback by Faculty

Description	Yes	No
Course includes the topic relevant to current trend	286	19
Electiveness of the course offered	288	17
Course content satisfies the course objectives	291	14
